#### Wednesday 23 May Workshops

##### Root Cause Analysis

Presented by: Dr Nelouise Geyer and René van Niekerk  
Venue: Break-away room

Short overview:

Adverse incidents and medical litigation are increasing in the health sector and we often find ourselves investigating such incidents. While we must account for our acts and omissions, blaming and punishing those involved in the incident does not resolve underlying problems that led to an adverse incident. This workshop aims to provide a tool to investigate adverse incidents within a just culture.

##### Social Media and the Law

Presented by: Elsabé Klinck and Annelie Meiring  
Venue: Main plenary room

Short overview:

Elsabé Klinck & Associates is a dynamic health care consulting service, focusing on law, regulation and policy in the health sector. They are committed to overcoming challenges in health care regarding policy and law. Their consultants are intensely aware of how these factors influence health care professionals, pharmaceutical companies, medical device companies and other health care stakeholders.

#### Thursday 24 May Workshops

##### Vascular Access

Presented by: Zenobia Rhama Daya  
Venue: Main plenary room

Short overview:

Vascular access is required for a variety of healthcare activities. The workshop aims to provide participants with the determinations of the scope of practice of nurses and the correct vascular access techniques.

##### Nurse Sensitive Indicators

Presented by: Annelie Meiring and Suseth Goosen  
Venue: Break-away room

Short overview:

Nursing-sensitive indicators are distinct and specific to nursing, and differ from medical indicators of care quality. The American Nursing Association identified 10 indicators for acute care facilities and the FPNL workshop aims at providing a platform for nurse leaders to identify the indicators to be used to benchmark the quality care across all the health sectors in South Africa.
